SASKATOON
REGIONAL
SCIENCE
FAIR

Project Requirements

The following components are required to participate in the Saskatoon Regional Science Fair. More information for each of the components can be found in our online experiment, study, and innovation packages.

1. ProjectBoard – You need to fully publish your findings and conclusions through a professionally written virtual presentation on ProjectBoard. For information on how to get started check out:
https://youthscience.public.doctract.com/doctract/documentportal/08DB14EF8F7E96B0F6B1B2D19FAB5E2B

2. Display – This is the final display that you will show to the world at the Saskatoon Regional Science Fair. You will need to present your project on a trifold backboard or poster display. Check out our resource packages for more information.

3. Abstract – A 150-word maximum summary of your topic. Check out our resource packages for more information.

4. Lab Book – A notebook or digital file including all procedures, results and observations in their raw form. Check out our resource packages for more information.

5. Oral Presentation – The scientific world emphasizes the value of sharing scientific findings with experts and members of the community. Check out our resource packages for more information.
